Simon Meister

Research Interests

Deep Reinforcement Learning

My primary research goal is building intelligent agents to learn and act in complex environments. To this end, i am interested in deep reinforcement learning. Currently, i am working on deep reinforcement learning for challenging video games (e.g. StarCraft II) at the Autonomous Systems Labs, TU Darmstadt.

Deep Learning

I am broadly interested in deep learning foundations and applications. Thus far, i have worked on end-to-end deep learning for computer vision, particularly for motion estimation [1] and object detection.
